Executive Summary

51
FRAGILE

The business is functioning but running hot. Most of the load is on the owner, and a handful of weak points are carrying disproportionate risk.

Per-Dimension Scores

Dimension	Score	Band
Personnel & Org	52	Fragile

Accounting & Finance	51	Fragile
Software Stack	53	Fragile
AI Readiness	61	Fragile
Sales & Marketing	47	Fragile
Operations & Process	47	Fragile

Top Risks

1. ACCOUNTING & FINANCE

I can state, within 10% accuracy, how many weeks of cash the business has available right now.

An owner who cannot state weeks of cash on command is flying blind on the single most important number in the business.

2. PERSONNEL & ORG

More than half of my leadership team would be considered A-players by a top competitor in our industry.

B-players hire C-players; talent drift compounds quietly until it becomes a full rebuild.

3. SALES & MARKETING

I can describe our ideal customer in one sentence, and my team would describe them the same way.

ICP drift is the most expensive unnoticed failure in sales.

How You Compare

Benchmarks for Professional Services

Metric	Yours	Median	Top Quartile	Standing
Annual voluntary turnover (%)	18%	18%	10%	Above median
Average days to fill a role	35	35	20	Above median
Days to close monthly books	10	10	5	Above median
Accounts receivable over 60 days (%)	12%	12%	5%	Above median
Number of paid SaaS tools in use	20	20	40	Above median
Annual software spend as % of revenue	6%	6%	12%	Above median
Number of workflows with AI augmentation in production	2	3	6	Above median
Customer acquisition cost (\$)	800	800	300	Above median
Monthly customer churn rate (%)	1.5%	1.5%	0.5%	Above median
On-time, in-full delivery rate (%)	94%	94%	98%	Above median
Mean time to resolve customer issues (hours)	12	12	4	Above median

Top Opportunities

1. PERSONNEL & ORG

Annual voluntary turnover (%)

Even a few points of turnover reduction pays for itself in avoided recruiting and ramp costs.

2. ACCOUNTING & FINANCE

Days to close monthly books

Every day you cut from the close gives you a day of faster decision-making.

3. AI READINESS

Number of workflows with AI augmentation in production

Each production AI workflow compounds — it trains the team, generates data, and unlocks the next one.

Recommended Next Steps

1. Accounting & Finance

Build a one-page weekly cash position report and review it every Monday morning for the next 90 days.

2. Personnel & Org

Rank your leadership team honestly on a 1–5 scale; anyone at 3 or below gets a 90-day bar or an exit plan.

3. Sales & Marketing

Write a one-sentence ICP, paste it in Slack, and ask the team to paraphrase it back; the gaps are the finding.

4. Personnel & Org

Interview your last three departures for the real reason they left, then fix the pattern.

5. Accounting & Finance

Set a hard close-day target and work backward to identify the bottleneck steps.

6. AI Readiness

Pick one high-volume, text-heavy process and deploy an AI tool on it within 30 days.

30 / 60 / 90 Day Action Plan

30 Days — Quick Wins

- **Accounting & Finance:** Build a one-page weekly cash position report and review it every Monday morning for the next 90 days.
- **Personnel & Org:** Rank your leadership team honestly on a 1–5 scale; anyone at 3 or below gets a 90-day bar or an exit plan.
- **Sales & Marketing:** Write a one-sentence ICP, paste it in Slack, and ask the team to paraphrase it back; the gaps are the finding.

60 Days — Systemic Fixes

- **Personnel & Org:** Interview your last three departures for the real reason they left, then fix the pattern.

90 Days — Strategic Initiatives

- **Accounting & Finance:** Set a hard close-day target and work backward to identify the bottleneck steps.
- **AI Readiness:** Pick one high-volume, text-heavy process and deploy an AI tool on it within 30 days.

Next step: 30/60/90 execution plan review.
