Rubric v0.1.0

Executive Summary

51
FRAGILE

The business is functioning but running hot. Most of the load is on the owner, and a handful of weak points are carrying disproportionate risk.

Per-Dimension Scores

Dimension	Score	Band
Personnel & Org	54	Fragile

Accounting & Finance	52	Fragile
Software Stack	54	Fragile
AI Readiness	68	Functional
Sales & Marketing	45	Fragile
Operations & Process	45	Fragile

Top Risks

1. ACCOUNTING & FINANCE

I can state, within 10% accuracy, how many weeks of cash the business has available right now.

An owner who cannot state weeks of cash on command is flying blind on the single most important number in the business.

2. PERSONNEL & ORG

More than half of my leadership team would be considered A-players by a top competitor in our industry.

B-players hire C-players; talent drift compounds quietly until it becomes a full rebuild.

3. SALES & MARKETING

I can describe our ideal customer in one sentence, and my team would describe them the same way.

ICP drift is the most expensive unnoticed failure in sales.
